Week 5 ()

Week 6 ()

Week 7 ()

☐ Evaluation and Evaluation Measures I (unit? unit=84&lesson=85)

☐ Evaluation and Evaluation

Week 7: Assignment 7 (Non Graded)

Assignment not submitted

Note : This assignment is only for practice purpose and it will not be counted towards the Final score.

1) For the ROC curve of True positive rate vs False positive rate, which of the following are **1 point** true?

- ☐ The curve is always concave (negative convex).
- ☐ The curve is never concave.
- ☐ The curve may or may not be concave

2) For the given confusion matrix, compute the recall

1 point

	True Positive	True Negative
Predicted Positive	8	3
Predicted Negative	2	7

- ☐ 0.73
- ☐ 0.7
- ☐ 0.8
- ☐ 0.78
- ☐ None of the above

3) Do you think that the bagging procedure can be useful to improve the performance of linear regression? **1 point**

- ☐ Yes
- ☐ No

Measures II -
Bootstrapping
and Cross
Validation (unit?
unit=84&lesson
=86)

☐ 2 Class
Evaluation
Measures
(unit?
unit=84&lesson
=87)

☐ The ROC
Curve (unit?
unit=84&lesson
=88)

☐ Minimum
Description
Length and
Exploratory
Analysis (unit?
unit=84&lesson
=89)

☐ Ensemble
Methods -
Bagging,
Committee
Machines and
Stacking (unit?
unit=84&lesson
=90)

☐ Ensemble
Methods -
Boosting (unit?
unit=84&lesson
=91)

☐ **Practice: Week
7: Assignment
7 (Non
Graded)
(assessment?
name=270)**

☒ Quiz: Week 7:
Assignment 7
(assessment?
name=299)

☐ Week 7
Feedback Form
: Introduction To
Machine
Learning (unit?
unit=84&lesson
=288)

☐ Insufficient information to answer the question

4) In which approach do the classification models train on data sets whose distribution are **1 point** modified in comparison to the distribution of the original training data set

- ☐ bagging
☐ boosting
☐ both
☐ neither

5) Considering the AdaBoost algorithm, which among the following statements are false? **1 point**

- ☐ In each stage, we try to train a classifier which makes accurate predictions on any subset of the data points where the subset size is at least half the size of the data set
- ☐ In each stage, we try to train a classifier which makes accurate predictions on a subset of the data points where the subset contains more of the data points which were misclassified in earlier stages
- ☐ The weight assigned to an individual classifier depends upon the number of data points correctly classified by the classifier
- ☐ The weight assigned to an individual classifier depends upon the weighted sum error of misclassified points for that classifier
